

Interactive Facilitation by participant with the community during Participatory Risk Assessment

Participants

CBDRM is a specialized course. It will cater to the competency and knowledge needs of operations staff, who are or would be involved in the design and implementation of CBDRM projects and programs in their organizations. Be they local government departments, NGOs, INGOs, UN, IFRC, emergency response agencies and/or private sector. Participants from policy and senior management levels of government, UN, donor organizations and INGOs are welcome, if they are interested to learn about how CBDRM is operationalized.

Overview & Activities

ADPC GEOGRAPHICAL COVERAGE

Primary Sub-regions

- ▣ Southeast Asia - Cambodia, Indonesia, Laos, Philippines, Thailand, Vietnam
- ▣ South Asia - Bangladesh, India, Nepal, Pakistan, Sri Lanka, Bhutan, Maldives
- ▣ East Asia - China, Korea

Support to the Pacific

- ▣ collaboration through SOPAC

RCC Membership

- ▣ Central Asia - Georgia, Kazakhstan
- ▣ West Asia - Iran, Jordan
- ▣ Pacific - PNG, East Timor

Countries of Asia and the Pacific

Asian Disaster Preparedness Center

ADPC conducts various Regional and National courses each year, concluding this year with the comprehensive Disaster Management Course from 8-26 November. Details of other courses can be found at www.adpc.net

Food and Hotel Accommodation Food is reasonably priced in the Philippines at about US\$15 a day. All learners will be lodged at a three-stars hotel. The room rate is US\$20 per night for single room and US\$10 per person for shared accommodation. Learners who prefer to stay in single rooms should inform ADPC in advance so that reservations can be made accordingly. Travel is to be arranged and paid directly by learners.

CBDRM
12

**Twelfth Course on
 Community Based
 Disaster Risk Management**

**5-16 July 2004
 Manila, Philippines**

Community Based Disaster Risk Management Training

The CBDRM course was initiated in order to provide an opportunity for practitioners to learn essential skills and knowledge to address implementation challenges in a systematic manner. The CBDRM curriculum is regularly reviewed in order to keep up with the latest development.

The CBDRM 12 will provide an opportunity for learners to acquire tools and obtain knowledge on “how to” design and implement programs for reducing vulnerability and hazards and building community capacity to promote a ‘culture of safety’. Through exercises and simulations, they will practice risk assessment and risk management planning.

The learners will have a chance to know about globally acknowledged programs and projects on community based disaster risk management from leaders of these initiatives. In particular the cases would include examples from South and South East Asian and Pacific regions.

CBDRM course will tackle the issues in disaster risk management from a developmental perspective. There will also be discussions on issues and problems concerning sustainability, replication/adaptation of CBDRM projects, ethics of CBDRM practice and integration of risk management plans with government and nongovernment development plans. The bulk of discussions would be in the Asian context.

However, learners from other regions are welcome to attend the course.

Objectives

At the end of the course the learners are expected to:

- Examine various models on disaster risk management;

- Design and conduct community based disaster risk assessment;
- Identify measures for hazard mitigation vulnerability reduction & community capacity building;
- Prepare a risk reduction plan & identify steps to integrate it in development activities;
- Analyze problems in the implementation of community based risk reduction plans;
- Describe areas of professional development to become an affective CBDRM practitioner;

Contents

The course is extended over 11 workdays with one Sunday off. It is structured around the following modules.

Context of community based disaster risk management:

in this module learners and resource persons will analyze risks and impact of disasters on communities in their countries and internationally.

Framework for CBDRM: The place of CBDRM in overall disaster risk management,

definitions of terms, analysis of different models, importance of community based approach and the process in different cultural contexts.

Community Risk Assessment:

Perceptions of risk, hazard, vulnerability and capacity assessment tools, and practice and application of tools followed by debriefing and discussions on ethics of CBDRM practice.

Risk Reduction Planning:

identification of risk reduction measures, prioritization, preparation of risk reduction plan, stakeholder analysis, organizational mechanism for plan implementation, examples on integration of risk reduction into development activities and planning facilitation skills. community preparedness, emergency response and sustainability and replication.

Future Directions:

Learners self-review, synthesis of learning log and re-entry plan, and integration of CBDRM into the organization of the learners.

Resource persons
CBDRM practitioners and experts from globally reputed international NGOs, UN agencies, technical organizations, resource centers,

Course Requirements

The course challenges each learner to comply with the following requirements:

- Work in a multicultural class with diverse individual experience levels and responsibilities
- Group work on selected themes and case studies
- Participation in exercises and simulation
- Individual re-entry or back home plan
- Active facilitation of learning events

Discussion on Interactive Training Materials

Chapati Diagram produced by villagers and participants

Learners's Assignments

Learners will maintain a learning log after each session on what to bring back to their organization and what/how to do in the community. At the end of the training, they will synthesize their learning from the log, which would involve designing their re-entry plans into their respective organizations.

Language Requirements

All teaching and course materials are in English. It is essential that learners have good command of English.
