

# Community/School based Rainfall Data Collection System for Landslide Early Warning and Dissemination

RECLAIM II: DEMONSTRATION PROJECT  
KALUTHARA DISTRICT, SRI LANKA

NATIONAL BUILDING RESEARCH ORGANIZATION

## Project Team

The Human Settlement Division (HSD) of National Building Research Organization carried out the project 'Community/School Based Rainfall Data Collection for Landslide Risk Reduction, Kaluthara District'. The project is carried out under financial assistance of Asia Disaster Preparedness Centre.

The Project Team comprised the following team members

Kishan Sugathapala	- Team leader, Head, HSD, NBRO
Sunil Jayaweera	- Coordinator, Scientist, HSD, NBRO
Sumedha Fernando	- Project Assistant, Scientist, HSD, NBRO
Supun Wimalasena	- Project Assistant, Scientist, HSD, NBRO
Kumari Dissanayake	- Typist, HSD, NBRO
Samantha Rohana	- KKS, HSD, HBRO

## **Summary**

National Building Research Organization (NBRO) was conducted a project on school based rainfall data collection for landslide risk reduction.

Rainfall data collection has a major role in the disaster risk determination. But most of the gauge stations in Sri Lanka were established in colonial period. The distribution pattern of rainfall gauge stations has to arrange in concern of disasters. It will help to develop more reliable and accurate disaster management system. Especially on hydrological disasters management methods, such as landslides risk zonation, flood vulnerability assessments. School base rainfall data collection system will help to collect accurate data using existing resources relatively quicker than all other methods of collection.

School based rainfall data collection centers can use as demonstration gauge stations and evaluate the feasibility. With the time school based rain fall collection stations can improve to rain gauge stations provides meteorological data to national level. It will help to arrange gauge stations in concern of disaster management.

The project is limited to Kaluthara district. The selection of project area is done according to landslide risk zonation map developed by NBRO. Selected schools for this project are from Matugama Educational Zone and Horana Educational Zone.

School Selection is done according to several criteria like Landslide Hazard level of the area of school situated, Number of students in the school, Functioning grade of the school (Category of school). If schools have senior students, implementation of the project is easy and can obtain accurate data. Availability of computer and other facilities of schools reduce the establishment cost of disaster management system.

The Disaster Management Cells were established in 10 schools by gathering students and with participation of a teacher. Rain gauges were distributed and taught methods of measuring rainfall. The project is to develop a landslide early warning system on the basis of rainfall. Schools also got place in community as landslide predictors and students will be having enhanced knowledge in specifically in landslides and disaster management in general.

Future of the DM cells can be ensured by converting disaster management cells into form of a school society. The project is to develop a landslide early warning system on the basis of rainfall. Even though having some limitations, this is a win-win solution to all parties.

## **Acknowledgement**

The project team appreciates the cooperation received from Matugama and Horana educational directors and principals of selected schools. The support given from Mr. KHMS Premalal, Mr.PDA Perera and staff of Meteorological Department and Major S Samaranayake, Sergeant N.M.Silva and staff of Disaster Management Centre Kaluthara office is also highly appreciated.

Special thanks also Mr.RMS Bandara, Head, Landslide Survey and Studies Division, NBRO for valuable contributions and inputs in the project.

Research team would like to thank Mr.WBJ Fernando, Director General, NBRO for his kind cooperation and directives given which made the study a success.

Finally, we should thank Mr. NMSI Arabepola Director, Asia Disaster Pre preparedness Centre for granting us the opportunity to carry out the study, which increases the capacity of study team.

## **Section 1 Background**

### **1.1 Introduction**

As a tropical country Sri Lanka is experiencing more hydrological disasters like flood, Landslide, Cyclones etc. Therefore in Sri Lanka, meteorological information has a major role in disaster management. But meteorological data collection is not oriented with disaster management, because meteorological data collection has begun about a century before the disaster management concept come into the world.

Most of the gauge stations in Sri Lanka were established in colonial period. The main purpose was help to plantation sector. Most of the time extrapolation of meteorology data has to perform due to not having enough gauge stations and not oriented with the purpose. It leads to less accuracy of information. Thus distribution pattern of gauge stations is not suit to give accurate meteorology information for the whole island.

Therefore the distribution pattern of gauge stations has to arrange according to new concepts and strategies. It will help to develop more reliable and accurate disaster management system. Especially on hydrological disasters management methods, such as landslides risk zonation, flood vulnerability assessments.

The main setback of re-arranging of gauge stations is not having enough resources, mainly financial assistance. Also establishment of several new gauge stations will take years. Then development of disaster risk map also will be delayed. Therefore an immediate step has to be taken with existing limited resources.

School base rainfall data collection system will help to collect accurate data using existing resources relatively quicker than all other methods of collection. Since schools are distributed randomly all over the country the data collection is representative. Students also will acquire knowledge about meteorology and aware about disaster management concepts.

## **1.2 Objectives**

- 1. Using existing landslide hazard zonation map and rainfall data providing an early warning system.**

Community based early warning system provide time to prepare and move to a secure place. This will minimize the damages to the community. The concept 'lives with disasters' can implement with this community based early warning system.

- 2. Prepare a demonstration system using rainfall data collected by schools and school-net for collect reliable and accurate rainfall data.**

School based rainfall data collection centers can use as demonstration gauge stations and evaluate the feasibility. With the time school based rain fall collection stations can improve to rain gauge stations provides meteorological data to national level. It will help to arrange gauge stations in concern of disaster management.

- 3. Aware school students on disaster management as active participants.**

Awareness of students is an effective way of aware community. Since disaster management is school subject awareness is easy and useful for students. Support from the school staff also will higher.

## **1.3 Scope**

1. Study will be limited to Kaluthara District administrative boundary. Kaluthara District is considered as the demonstration area. If the project successful in future it may implement to other areas also.
2. Schools are selected based on the Landslide hazard zonation map of NBRO. Landslide is a major hazard experience in Sri Lanka nowadays. Therefore the project initiates only considering landslide hazard and will expand to other disasters also.
3. Schools with facilities get the priority for the project. Existing facilities of schools is reduce the initiate cost of the project. Also it helps to begin the project quicker.

## **1.4 School Selection Process**

Details of schools in Kaluthara District were collected from the department of education. From this list schools were screened for establishing the rain gauges based on the following criteria.

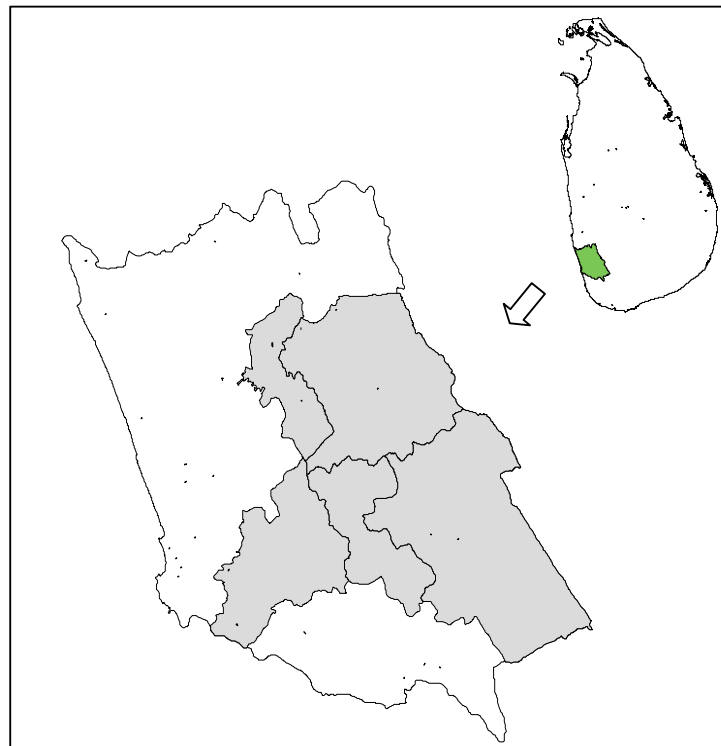

- Landslide Hazard level of the area of school situated
- Number of students in the school
- Functioning grade of the school (Category of school)
- Availability of computer and other facilities

### **a. Landslide Hazard level**

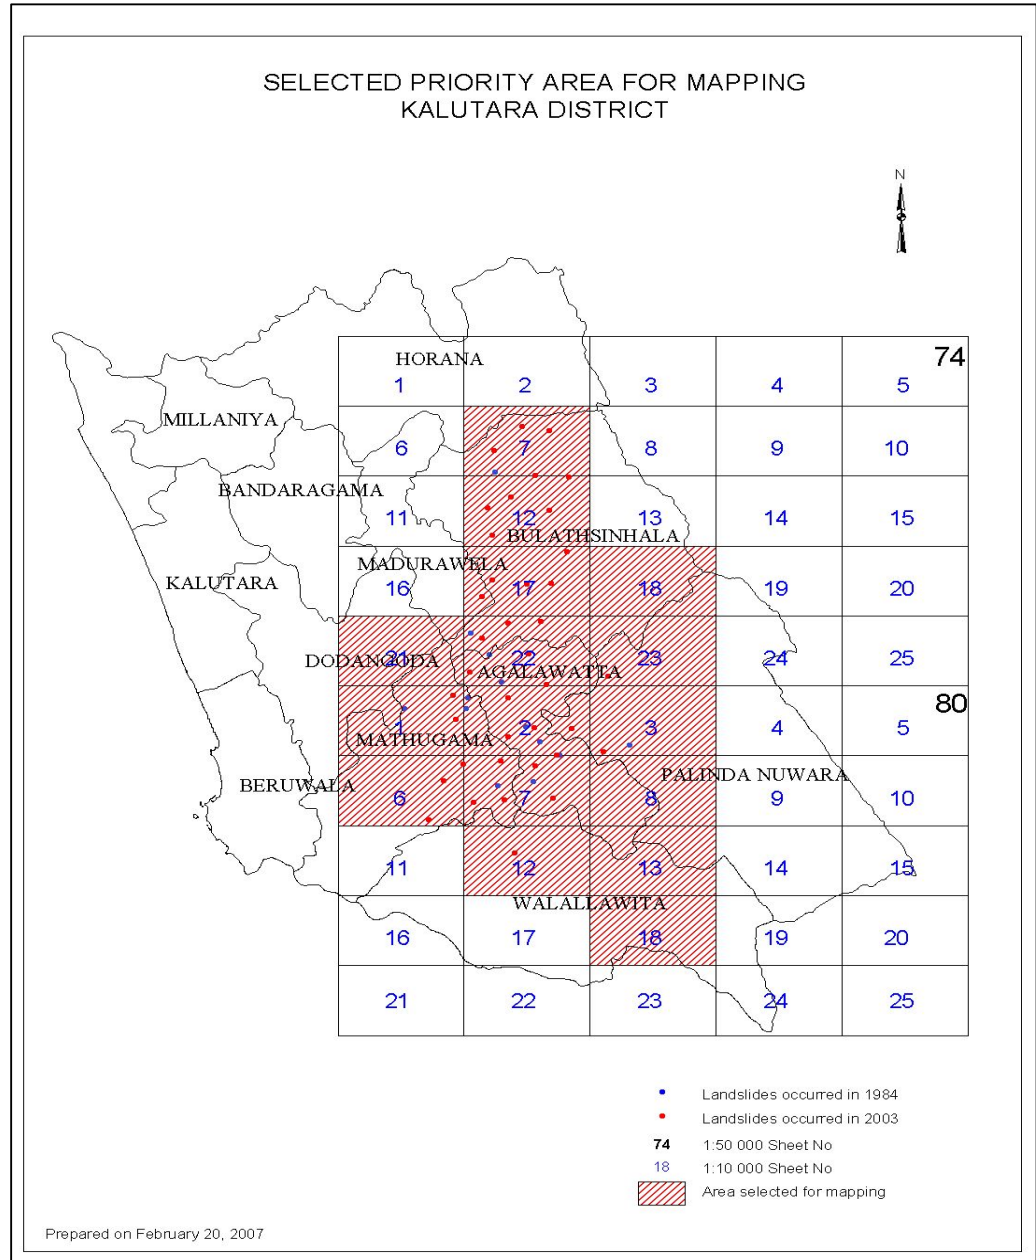

*(See screened school list in Annexure IA)*

Currently Kaluthara district has been mapped on landslide hazard level by National Building Research Organization (NBRO). According to point locations of landslide hazard Map Agalawatta educational division of Matugama education zone and Bulathsinhala educational division of Horana education zone were selected at the screening for landslide hazard level of the Kaluthara district. These education zones are located in Matugama, Palindanuwara, Madurawala Agalawatta and Bulathsingala Divisional Secretarial Divisions.

**Figure 01**  
-Location of  
Matugama,  
Palindanuwara,  
Madurawala  
Agalawatta and  
Bulathsingala  
Divisional Secretarial  
Divisions

**Figure 02**  
 -Landslide Occurred points  
 (Source: Landslide Survey and Studies Division, NBRO)

**b. Number of students in the school**

(See screened school list in Annexure 1-B)

Number of students was considered since it allows good transfer knowledge. Also higher the number of students easier to screen self motivated members to DM cells. It leads an active DM cells. Therefore schools more than 200 students has considered to the second screening.

**c. Functioning grade of the school**

Functioning grade indicate grade of classes in the schools. There are 4 functioning grades of schools. They are,

<i>(See screened school list in Annexure 1-C)</i>	1AB	-	Schools with Science stream in advance level
	1C	-	Schools with Art and Commerce stream in advance level
	Type 2	-	Schools with classes up to ordinary level
	Type 3	-	Schools with classes up to year 8 or year 5

If schools have senior students, implementation of the project is easy and can obtain accurate data. However hard due to lack of A/L (type 1AB and 1C), type 2 also was considered for this screen.

**d. Availability of computer and other facilities**

*(See screened school list in Annexure 1-D)* Availability of computer and other facilities of schools reduce the establishment cost of disaster management system. Therefore it is better to consider facilities in the selection process. Information about computer facilities was obtained by education ministry.

*(Final Screened School List is attached as Annexure II)*

*(See the invitation letter in Annexure III)* With the screened school list a key meeting was called to discuss the next step which establishment of school disaster management cells and school awareness program.

## **Section 2 Project Implementation**

### **2.1 Project Implementation Stakeholders Meeting**

*(Names of participants attached as Annexure V)*

The meeting was held at NBRO on 20<sup>th</sup> January 2009 with participation of key officers of NBRO, Disaster Management Centre, Department of Meteorology, Ministry of Disaster Management & Human Right and Zonal Education Offices of Matuhgama and Horana. Although an invitation was forwarded to Ministry of Education IT director was not present at the meeting.

At this meeting a presentation on introduction of project was delivered by Mr. *Kishan Sugathapala*, Head, Human Settlement Division, NBRO. The presentation explained the main objective of the project as gathering accurate data at local level for landslide risk reduction. By using the landslide hazard zonation maps that are prepared along with the rainfall data collected at local level through this project.

**Figure 03**  
*- Stakeholders meeting*

According to the presentation existing rainfall data collecting centers are not established in landslide vulnerable area. These data collecting centers are mainly established based on the distribution of plantation sector. Therefore it was explain that to collect rainfall data for landslide prediction and early warning can be done through the existing schooling system. This will enhance the knowledge base school children on disaster management especially on landslide. Also schools will have a regular system to collect data if they are trained properly.

Mr.RMS Bandara, Head, Landslide Survey and Studies Division, NBRO discussed the importance of rainfall data in landslide mitigation or risk reduction. In this presentation Mr.RMS Bandara emphasized that rainfall is the main factor of landslide risk among many other factors. If there is a method to measure rainfall in it gives an idea of landslide possibility. Then the community can be warned and minimize the damages of landslide.

Both these presentations forced on the concept of living with landslides.

In the meeting it was discussed about the methodology and process development of the project. Especially on selection of suitable schools and establishment of rain gauges. In addition to that final expectation and outcomes of the project also discussed.

## 2.2 Stakeholder concerns

- Mr.U.D.D Gunasinhe, Director of Education, Zonal Education Office, Mathugama requested that the project scope should extent for other disasters also. Because of Kaluthara district is affected severely by flood apart from landslide.
- Relevant technical knowledge and equipments should provide to students and should monitor the progress time to time.
- Meteorological department not use these data in national level since the problem related to accuracy and inability of collect data daily. It can use in secondary level to as verification of national level data.
- Relevant zonal education official are to judge the schools to establish rainfall collecting centers. Therefore it was decided to request them to select schools from current list.

## 2.3 Finalizing the schools

(See the request letters in Annexure IV)

A request letters were sent to Horana and Mathugama zonal education offices to finalize 10 schools from both areas based on their judgment.

1. Mihindu Maha Vidyalaya
2. Kudaligama Maha Vidyalaya
3. Meegama K.V
4. Veyangalla Muslim M.V.
5. Ananda Shasthralaya
6. Diwalakada K.V.
7. Ratmale K.V.
8. Geekiyanakanda
9. Athale K.V.
10. Govinna M.V.

Geekiyanakanda Tamil Maha Vidyalaya is located in a land which was occurred landslide. As a special case the school has selected even though it hasn't enough facilities.

## 2.4 Rain gauges

Meteorological department rain gauge specifications and methods of establish them were obtained from the Meteorological Department. Specifications for rain gauges were obtained from the instrument branch of Meteorological department. These specifications are for national level rainfall measuring centers and therefore the specifications were modified to suit the school system.

### **Followings are the specifications.**

- Gauge material - Copper or Galvanize
- Collecting Funnel diameter - 127mm(5 inches)
- Inner cane Height - 490mm
- Diameter of Outer cane Base - 260mm
- Measuring cylinder minimum measure - 0.1mm(Rain fall)

Quotations were called from reputed suppliers with the list obtained for meteorological department and NBRO reputed suppliers.

According to meteorological department copper rain gauges are not suitable for distribution among schools due to high value. A proper security should be provided if copper rain gauges are distributed. Glass measuring cylinders also not suit because vulnerable to break. Plastic measuring cylinders can be use, but the accuracy would have been less due to less transparency in time. But it can be overcome by giving more than one plastic measuring cylinders to schools.

Rain gauges from Vidya Shipa(Pvt) Ltd were purchased with following specifications.

- Gauge material - Galvanize, Copper painted
- Collecting Funnel diameter - 160mm
- Diameter of Outer cane Base - 160mm
- Measuring cylinder minimum measure(Plastic) - 0.2mm(Rain fall)

**Figure 04 -**  
Purchased rain  
gauges from  
Vidyashilpa(Pvt) Ltd

## 2.5 Disaster Management cell development

Workshops were conducted in selected schools with participation of resource persons apart from NBRO

- Disaster Management Centre Kaluthara District Office
- Regional Education Office
- Meteorological department

In these workshops 3 key lectures were delivered,

1. Landslide Hazard Mapping and Rainfall data collection by NBRO
2. Importance of rainfall data by Meteorological department
3. Role of Disaster Management Center in early warning by DMC district office, Kaluthara

**Figure 05 -**  
*Workshops in schools*

The Disaster Management Cells were established in 10 schools by gathering students and with participation of a teacher. They are

1. Mihindu Maha Vidyalaya
2. Kudaligama Maha Vidyalaya
3. Meegama K.V
4. Veyangalla Muslim M.V.
5. Ananda Shasthralaya
6. Diwalakada K.V.
7. Ratmale K.V.
8. Geekiyanakanda
9. Athale K.V.
10. Govinna M.V.

*(See the list of workshops and detail of those schools in annexure I-E)*

Rain gauges were distributed and taught methods of measuring rainfall. After establishment of Disaster Management Cells and facilitating them, monitoring and further awareness programs of early warning system will be conducted.

In addition to rainfall data collections a chart of landslide possibility is given to these DM cells. Then rainfall data can be used directly for early warning system by the community. The chart indicates the rainfall and relevant possibility of landslides.

## **Section 3 Recommendations**

### **3.1 Conclusion**

The project is to develop a landslide early warning system on the basis of rainfall. Even though having some limitations, this is a win-win solution to all parties. NBRO will be able to forecast landslides with established rain gauges at local level and on the other hand students' disaster management and meteorological knowledge will be enhanced apart from the DM cell development which gives the sustainability of the project. Another important thing that was achieved is the establishment of community/school base rain gauge stations that will increase the capabilities of affected communities and promoting the concept of 'Living with Landslides'.

Schools also got place in community as landslide predictors and students will be having enhanced knowledge in specifically in landslides and disaster management in general.

Since this is a demonstration project, if the project is successful it can be implemented in other landslide areas too. This will help to develop this kind of system for other disaster risk rather than landslide susceptibility.

This demonstration project is a short term project of meteorology data collection. But it will guide to establish permanent gauge station and re-arrange existing distribution pattern of rain gauge stations in long term.

### **3.2 Recommendations**

According to above conclusions following recommendations can be made.

Future of the DM cells can be ensured by converting disaster management cells into form of a school society. Then the knowledge will flow new members when junior students are trained by senior students. Projects coordinators only have to visit and monitor the progress time to time.

If DM cells convert as regular societies of students rainfall data collection would perform even in holidays and vacation periods also. Since students work as a team volunteers can find to get readings in holidays and vacation periods. Security problem can be minimized by giving responsibility of rain gauges to these societies.

The given chart for use early warning system is a general chart of rainfall and landslide risk. NBRO has divided the area into five categories on the basis of past experience of landslide. According to these categories affect by rainfall to the landslide risk is differ. Therefore specified chart is more effective rather than general chart.

So relevant specified chart has to develop and given for these school based DM cells according to its location. Then the accuracy of the early warning system will be increased.

### Section 4 Budget and expenditure

	Budgeted Amount (SL Rs)	Actual Expenditure (SL Rs)
Project Implementation	146,250.00	154,500.00
Traveling and Transportation	160,000.00	167,250.00
School DM cells development	100,000.00	130,000.00
School Rainfall gauge	250,000.00	225,000.00
Internet Service	75,000.00	75,000.00
	<b><u>731,250.00</u></b>	<b><u>751,750.00</u></b>

Attn : Mr. Neel Fernando, Director, IT

Secretary,  
Ministry of Education,  
Isrupaya,  
Battaramulla.

Dear Sir,

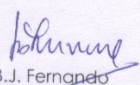

**Community / School Base Rainfall Data Collection for Landslide Risk Reduction -  
Demonstration Project in Kalutara District**

Asian Program for Regional Capacity Enhancement for Landslide Disaster Mitigation (RECLAIM) is conducted by Asian Disaster Preparedness Center (ADPC) collaborated with National Building Research Organisation (NBRO) in Sri Lanka. Under this program community/school base rainfall data collection for landslide disaster risk reduction demonstration project is to be conducted for Kalutara district. In this program rainfall data is to be collected by community/ schools in Kalutara district as a part of landslide risk reduction measures.

Main objective of the project is "Project envisages to create awareness, help community, schools, plantation sector and other stakeholders on timely evacuation or early warning on landslides by using the landslide hazard map and accurate rainfall data".

With regard to the above project an initial meeting with all the national level stakeholders is to be held on 12<sup>th</sup> of January 2009 at NBRO Auditorium at 2.30 p.m. Main objective of the meeting is to work out a plan in implementing of this project. We kindly request you to nominate a suitable representative to this meeting and the agenda is attached. If your representative needs further classifications he may contact Mr. Kishan Sugathapala, Head, Human Settlements Division, NBRO on 071-4447598.

Thank you.  
Yours faithfully,

  
W.B.J. Fernando  
Director General  
National Building Research Organisation.

### **Tentative Agenda**

- Welcome speech      *Mr. W.B.J. Fernando, Director General, National Building Research Organisation*
- Importance of Landslide Mitigation and Rainfall Data  
*Mr. R.M.S. Bandara, Head, Landslide Studies and Services Division, National Building Research Organisation*
- Project Introduction      Kishan Sugathapala, Head, HSD
- Discussion
- Closing Remarks and Work Plan

 Your Ref ) ..... Date ) 23<sup>rd</sup> ජනවාරි 2009

කේතනීය වශයෙන් පැවැත්වූ මූලික සැසියා සහතික වූ  
 කලාපීය අධ්‍යයන කාර්යාලය.  
 කලාපීය අධ්‍යයන කාර්යාලය.  
 කලාපීය අධ්‍යයන කාර්යාලය.

අගමැති ආපදා අවම කිරීම සඳහා වූ පාසල් පාදක වර්ෂා දත්ත එකතු කිරීමේ ක්‍රියාවලිය

2009 ජනවාරි 20 වන දින ජාතික ගොඩනැගිලි පර්යේෂණ සංවිධානයේ පැවැත්වූ මූලික සැසියා සහතික වූ  
 මහා කාර්ය මණ්ඩලය වෙත.

ආසියාතික පෙර සූදානම් වීමේ වගකීම. ජාතික ගොඩනැගිලි පර්යේෂණ සංවිධානය සමඟ සහයෝගීව  
 ප්‍රාදේශීය මට්ටමින් නායකත්ව ආපදා කළමනාකරණය වර්ධනය කිරීම සඳහා ආසියාතික වැඩසටහනක් ආරම්භ  
 කර තිබේ. මෙම වැඩසටහන යටතේ ප්‍රජාව මූලිකව වර්ෂා දත්ත එකතු කිරීම සඳහා පාසල් පදනම් කරගත්  
 වැඩසටහනක් කපතර දික්වූයේ ආපදා අවම කිරීමට සම්බන්ධ ක්‍රියාවලියේ කොටසක් ලෙස වර්ෂාපතන දත්ත රැස්  
 කිරීම, සිදුකරනු ලැබේ.

මූලික සැසියේදී සාකච්ඡා කරගත් පරිදි වර්ෂාපතන සවිකිරීම සඳහා අගලවන්න, මතුගම අධ්‍යයන කොට්ඨාශවල  
 පාසල් කිහිපයක් තෝරා ගන්නා ලදී. එම තෝරාගැනීම පහත සටහනේ දැක්වේ.

1. පාසල තිබෙන ප්‍රදේශයේ නායකත්ව ආපදා විය හැකි වේද
2. පාසලේ සිටින ශිෂ්‍යයන් ගණන
3. පාසලේ වර්ගය
4. පරිගනක පහසුකම්

මෙසේ තෝරාගත් පාසල් අතරින් අවසන් වශයෙන් සුදුසු පාසල් තෝරා ගැනීම අදාළ කලාපීය අධ්‍යයන කාර්යාල  
 මුල් කර ගනිමින් සිදුකිරීමට බලාපොරොත්තු වේ.

අප තෝරාගත් පාසල් ලිපිකරණ පහත වගුවේ දැක්වේ.

මූලික-විකල්ප අධ්‍යයන කොට්ඨාශය					
	පාසලේ නම	ශ්‍රේණිය		පාසලේ නම	ශ්‍රේණිය
1	මූලික-විකල්ප මධ්‍ය මහා විද්‍යාලය	I AB	8	මල්ලකන්ද දෙමළ මහා විද්‍යාලය	Type 2
2	අච්චිකම මහා විද්‍යාලය	I AB	9	දියකඩු විද්‍යාපීඨ කිහිපය විද්‍යාලය	Type 2
3	කෝවින්න මහා විද්‍යාලය	I AB	10	මහගම කිහිපය විද්‍යාලය	Type 2

පදිංචි විදේශික මිය.  
 කලාපීය අධ්‍යාපන අධ්‍යයන.  
 කලාපීය අධ්‍යාපන කාර්යාලය.  
 මතුගම.

මහත්මයාණෙනි.

**නායයෑම් ආපදා අවම කිරීම සඳහා වූ පාසල් පාදක වර්ෂා දත්ත එකතු කිරීමේ ක්‍රියාවලිය**

2009 ජනවාරි 20 වන දින ජාතික ගොඩනැගිලි පර්යේෂණ සංවිධානයේ පැවැත්වූ මූලික සැසියට සහභාගි වූ මඛට කෘතඥ පූර්වක වෙමි.

ආසියාතික පෙර සුදානම් වීමේ මධ්‍යස්ථානය, ජාතික ගොඩනැගිලි පර්යේෂණ සංවිධානය සමග සහයෝගීව ප්‍රාදේශීය මට්ටමින් නායයෑම් ආපදා කළමනාකරණය වර්ධනය කිරීම සඳහා ආසියාතික වැඩසටහනක් ආරම්භ කර තිබේ. මෙම වැඩසටහන යටතේ ප්‍රජාව මූලිකව වර්ෂා දත්ත එකතු කිරීම සඳහා පාසල් පදනම් කරගත් වැඩසටහනක් කඵතර දිස්ත්‍රික්කය තුළ ප්‍රායෝගිකව දියත් කිරීමට කටයුතු කර තිබේ. මෙම වැඩසටහන යටතේ කඵතර දිස්ත්‍රික්කයේ නායයෑම් ආපදා අවම කිරීමට සම්බන්ධ ක්‍රියාවලියේ කොටසක් ලෙස වර්ෂාපතන දත්ත රැස් කිරීම සිදුකරනු ලැබේ.

මූලික සැසියේදී සාකච්ඡා කරගත් පරිදි වර්ෂාපතන සවිකිරීම සඳහා අගලවත්ත, මතුගම අධ්‍යාපන කොට්ඨාශවල පාසල් නිසසක් තෝරා ගන්නා ලදී. එම තෝරාගැනීම පහත කරුණු යටතේ සිදුවිය.

1. පාසල තිබෙන ප්‍රදේශයේ නායයෑම් ආපදා විය ගැනි මට්ටම
2. පාසලේ සිටින සිසුන් ගණන
3. පාසලේ වර්ගය
4. පරිගනක පහසුකම්

මෙසේ තෝරාගත් පාසල් අතරින් අවසන් වශයෙන් සුදුසු පාසල් තෝරා ගැනීම අදාල කලාපයේ අධ්‍යාපන කාර්යාල මුල් කර ගනිමින් සිදුකිරීමට බලාපොරොත්තු වේ.

අප තෝරාගත් පාසල් ලයිස්තුව පහත වගුවේ දැක්වේ.

**මතුගම අධ්‍යාපන කොට්ඨාශය**
