Monitoring & Evaluation in Disaster Risk Reduction

📅 20-22 August 2025

adpc

Monitoring and Evaluation in DRR is essential for learning, adapting, and strengthening resilience.

Monitoring and Evaluation (M&E) is crucial for effective Disaster Risk Reduction (DRR). It allows us to understand what works, identify gaps, and continuously improve our strategies to build more resilient communities. Without robust M&E, our efforts to mitigate risks and respond to disasters may fall short.

Individuals seeking to enhance their skills in this vital area are invited to join our upcoming course to learn practical approaches and tools for integrating M&E into DRR initiatives. Elevate your impact and contribute to a safer future!

Further details regarding the M&E in DRR initiative, scheduled for 20-22 August 2025 in Bangkok, Thailand, are available through registration.

In this course, Participants will:

- **Understand DRR and M&E fundamentals:** Grasp core DRR concepts and the essential role of M&E within DRR frameworks.
- **Master M&E concepts:** Learn about Results-Based Management (RBM), Theory of Change, Logical Frameworks, and evidence-based decision-making, including gender-responsive M&E.
- **Plan comprehensive M&E systems:** Design M&E plans covering scope, results frameworks, data management, reporting, capacity building, and budgeting.
- **Integrate M&E into DRM:** Effectively apply M&E throughout the entire DRM project cycle, from design to learning.
